

Data Scientist – Job Description

We are looking for a passionate and analytical Data Scientist to join our growing team. The ideal candidate will work with structured and unstructured data, build predictive models, generate business insights, and support data-driven decision-making across the organization.

Key Responsibilities

- Collect, clean, and preprocess large datasets from multiple sources.
- Develop machine learning models for prediction, classification, and recommendation tasks.
- Perform exploratory data analysis (EDA) to identify patterns and trends.
- Build dashboards and visualizations using tools such as Power BI or Tableau.
- Collaborate with engineering and business teams to solve real-world problems.
- Deploy and monitor machine learning models in production environments.
- Communicate findings clearly to technical and non-technical stakeholders.

Required Skills

- Strong knowledge of Python and libraries such as Pandas, NumPy, Scikit-learn, and Matplotlib.
- Understanding of machine learning algorithms and statistical techniques.
- Experience with SQL and database querying.
- Knowledge of data visualization tools like Power BI or Tableau.
- Familiarity with cloud platforms such as AWS, Azure, or Google Cloud is a plus.
- Good problem-solving and communication skills.

Educational Qualifications

- Bachelor's or Master's degree in Data Science, Computer Science, Statistics, Mathematics, or related fields.

Preferred Qualifications

- Experience with deep learning frameworks such as TensorFlow or PyTorch.
- Knowledge of NLP, Computer Vision, or Generative AI concepts.
- Hands-on experience with real-world data science projects.

Tools & Technologies

- Python
- SQL
- Power BI / Tableau
- Excel
- Jupyter Notebook
- Git & GitHub
- AWS / Azure / GCP

Job Details

- Role: Data Scientist
- Experience: 0–3 Years
- Employment Type: Full-Time
- Location: Remote / Hybrid / On-site
