Professional Summary

Aspiring Data Scientist with strong knowledge of Python, SQL, Machine Learning, Data Analytics, and Deep Learning concepts. Skilled in building end-to-end data-driven projects using tools like Power BI, Pandas, NumPy, and Scikit-learn. Passionate about solving business problems using analytics, predictive modeling, and visualization techniques.

Technical Skills

- Programming: Python, SQL, C++
- Data Analysis: Pandas, NumPy, Excel
- Machine Learning: Regression, Classification, Clustering, Model Evaluation
- Visualization: Power BI, Matplotlib, Tableau
- Tools: Jupyter Notebook, Git, GitHub
- Cloud & Platforms: AWS Basics, Google Colab
- Databases: MySQL, PostgreSQL

Projects

1. Customer Churn Prediction System

- Built a machine learning model to predict customer churn using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation.
- Achieved high prediction accuracy using Random Forest and Logistic Regression models.

2. Sales Analytics Dashboard

- Developed an interactive Power BI dashboard for sales trend analysis.
- Used SQL and Excel datasets to generate KPIs and business insights.
- Helped identify top-performing products and regional sales patterns.

3. Resume Screening AI Tool

- Created a resume-job description matching system using NLP techniques.
- Extracted skills and calculated similarity scores using Python libraries.
- Improved recruiter efficiency in candidate shortlisting.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering
2022 – 2026 | CGPA: 8.2/10

Certifications

- Machine Learning with Python
- Data Analytics & Visualization using Power BI
- SQL for Data Science
- Deep Learning Fundamentals

Achievements & Activities

- Built multiple end-to-end analytics and AI projects.
- Active learner in Data Science and Deep Learning domains.
- Participated in coding challenges and technical workshops.
